

8. In the number 654,

'6' is in the hundreds place. It stands for 600.

'5' is in the tens place. It stands for 50.

'4' is in the units place. It stands for 4.

9. There are 598 rabbits, 505 chickens and 589 sheep. Which animal is the most?

rabbits is the most.

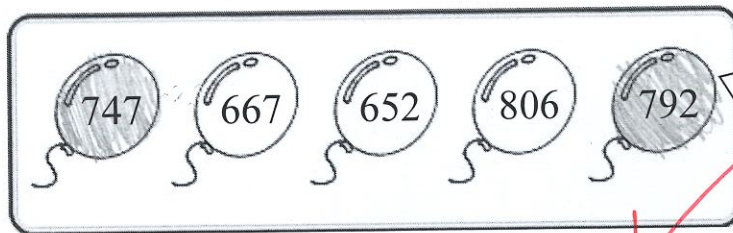

Very good! You've aligned all the numbers according to their place when comparing numbers!

Part B : Problem-solving questions.

10. Colour the balloons with numbers greater than '700' but smaller than '800'.

Cross out the numbers that are greater than "800" and smaller than "700". The balloons left behind will be the answer.

11. Use the 3 number cards 5 4 9 to form the greatest 3-digit odd numbers.

The answer is 945.

5 and 9 are the odd numbers, 4 is an even number.

★ What is the greatest 3-digit even number?

(998)

Checklist: Please 「✓」 if you have done the following:

☒	I compare the 3-digit numbers from hundreds place, then tens place and finally units place.
